

DENY ORIGINATION

Prevent call placement from a line.

How it works:

This feature, which is set up by the telephone company, denies origination of calls from a line. The line is prevented from making calls to other lines.

To “turn on” the service:

1. Call the telephone business office and have them set your number up for Deny Origination.

Note:

- A Call will no longer be able to be placed from the line “set up” for this feature, until changed by the telephone company.
