3.7.1.5 The Customer shall be responsible for all loss regardless of cause (other than directly resulting from an act or omission of the Company) to the Company's equipment on the Customer's or its authorized user's premises.

3.7.1.6 The Customer is responsible for ensuring that, except for Customer authorized and qualified personnel, no one attempts to adjust, modify, move or otherwise interfere in any way with the continuous operation of the Company's equipment located at the Customer's or authorized user's premises.

3. GENERAL RULES AND REGULATIONS (Cont'd)**3.7 EQUIPMENT** (Cont'd)**3.7.2 Terminal Equipment**

3.7.2.1 The Company's facilities and service may be used with or terminated in Customer-provided terminal equipment or Customer-provided communications systems. Such terminal equipment shall be furnished and maintained at the expense of the Customer, except as otherwise provided in this price list. The Customer is responsible for all costs at its premises, including Customer personnel, wiring, electrical power, and the like, incurred in the use of the Company's service.

3.7.2.2 When such terminal equipment is used, the equipment shall comply with the minimum protective criteria set forth below and shall not interfere with service furnished to other Customers. Additional protective equipment, if needed, shall be employed at the Customer's expense.

3.7.2.3 When service(s) using voice grade facilities is terminated in Customer-provided terminal equipment, channel derivation devices, or communications systems, the Customer shall comply with the following minimum protective criteria:

a. When the facilities furnished under this price list are used in common with local telephone company services, it is necessary in order to prevent excessive noise and cross talk, that the power of the signal applied to the local lines be limited. A single valued limit for all application cannot be specified. Therefore, the power of the signal in the band over 300 hertz which may be applied by the Customer-provided equipment at the point of termination will be specified by the Company for each application, to be consistent with the signal power allowed on the telecommunications network as specified in FCC Part 68 Rules and Regulations.

b. To protect the telecommunications services from interference at frequencies which are above the band of service provided, the carrier will specify the acceptable signal power in the following bands to be applied by the Customer-provided equipment or communications system at the point of termination to insure that the input to facilities of the Company or other communications company that the Company connects with does not exceed the limits indicated.

3. GENERAL RULES AND REGULATIONS (Cont'd)3.7 EQUIPMENT (Cont'd)

3.7.2 Terminal Equipment (Cont'd)

3.7.2.3 (Cont'd)

1. The power in the band from 3,995 hertz to 4,000 hertz shall be at least 19 dB below the power of the signal as specified in Subsection a. preceding.

2. The power in the band from 4,000 hertz to 10,000 hertz shall not exceed 24 dB below one milliwatt.

3. The power in the band from 10,000 hertz to 25,000 hertz shall not exceed 24dB below one milliwatt.

4. The power in the band from 25,000 hertz to 40,000 hertz shall not exceed 36 dB below one milliwatt.

5. The power in the band above 40,000 hertz shall not exceed 50 dB below one milliwatt.

c. Where there is connection via Customer-provided terminal equipment or communications systems to a Message Telecommunications Service to prevent the interruption or disconnection of calls or interference with network control signaling, it is necessary that the equipment to the interface at no time has energy solely in the 2450 to 2740 hertz band. If signal power is in the 2450 to 2750 hertz band, it must not exceed the power present at the same time in the 800 to 2450 hertz band.

d. Where such Customer-provided equipment or communications system applies, signals having components in the frequency spectrum below 300 hertz, excluding ringing signals, the currents and voltages (including all harmonics and spurious signals) at the interface shall not exceed the limits indicated in 1. through 4. following:

2. The magnitude of the peak of the conductor or ground voltage shall not exceed 70 volts.

3. The conductor voltage shall be such that the conductor-to-ground voltage limit in b. preceding is not exceeded. If the signal source is not grounded, the voltage limit in b. preceding applies to the conductor-to-conductor voltage.

4. The total weighted rms voltage within the band from 50 hertz shall not exceed 100 volts. The total weighted rms voltage is the square root of the sum of the products times the square of the rms voltage of the individual frequency components. The weighting factors are indicated.

<u>For Frequencies Between</u>	<u>Weighting Factor</u>
50 Hertz and 100 Hertz	$f^2 / 10^4$
100 Hertz and 300 Hertz	$f^{3.3} / 10^{6.6}$

Where f is the numerical value of the frequency, in hertz, of the frequency component being weighted.

3.7.2.4 If the Customer fails to maintain and operate its terminal equipment properly, resulting in the occurrence or possibility of harm to the Company's equipment, personnel, or the quality of service to other Customers, the Company may, upon written notice, require repair, maintenance or the use of protective equipment at the Customer's expense. If such repair, maintenance or use of protective equipment fails to produce satisfactory results, the Company may, upon written notice, terminate the Customer's service immediately.

3.8 CANCELLATION OF SERVICE

3.8.1 For any of the following reasons, the Company may discontinue service upon at least 8 weekdays' notice or cancel an application for all services without incurring any liability. Separate accounts for the same Customer are also subject to this provision.

3.8.1.1 In the event that a Customer's bill remains unpaid after more than thirty days following rendition of the bill.

3.8.1.2 In the event of a violation of any regulation governing the service under this price list, when necessitated by conditions beyond the Company's control, a violation of any law, rule, or regulation of any government authority having jurisdiction over the service.

3.8.1.3 Where the Company is prohibited from furnishing services by order of a court or other government authority having jurisdiction.

3.8.2 The Company, by written notice to the Customer, may, without incurring any liability, cancel or suspend the provision of service or equipment for non-payment of any sum due to the Company from the Customer, whether pursuant to service offered under this price list or otherwise, or as a result of actions of a government agency which forces discontinuance of the provision of service or equipment, or for violation or threatened violation of any of the terms or conditions of this price list by the Customer or authorized user, or if the Customer becomes insolvent or bankrupt, or makes a general assignment for the benefit of creditors or as otherwise permitted by this price list. Cancellation will be effective on the date specified on the notice.

3.8.3 Service may be canceled by the Customer on written notice to the Company or as otherwise authorized by lawful change of presubscribed carrier. In the event the Company is unable to disconnect the Customer's access line by the requested cancellation date, the customer will be responsible for any usage over the line.

LONG DISTANCE INTRASTATE TELECOMMUNICATIONS SERVICE

3. GENERAL RULES AND REGULATIONS (Cont'd)**3.8 CANCELLATION OF SERVICE** (Cont'd)

3.8.4 The discontinuance of service by the Company pursuant to this Section does not relieve the Customer of any obligations to pay the Company for charges due and owed for service(s) furnished up to the time of discontinuance.

3.8.5 The remedies set forth herein shall not be exclusive and the Company shall at all times be entitled to all rights available to it under either law or equity.

3.8.6 Where the Company cancels a service and the final service period is less than the monthly billing period, a credit will be issued for any amounts billed in advance, prorated at 1/30th of the monthly recurring charge for each day after the service was discontinued. This credit will be issued to the Customer or applied against the balance remaining on the Customer's account.

3.8.7 The Customer shall pay a cancellation charge for services that require special facilities dedicated to its use when the Customer cancels the order before service begins or prior to the expiration of the service term or if service is canceled for nonpayment or failure to make a requested deposit. The charge will be equal to the non-recoverable portion of expenditures or liabilities incurred expressly for the Customer and the sum of the monthly recurring or minimum usage amount remaining through the end of the term. The Customer is liable for any charges assessed by the interconnecting telephone company providing the dedicated local access line.

3.8.8 Nothing in this Section 3.8 shall be construed to modify the Company's obligations under WAC 480-120-081, or now existing or hereafter modified or replaced.

3.9 DETERMINATION AND RENDERING OF CHARGES

3.9.1 For the purpose of billing, service will be deemed to be started on the day the service and its associated equipment, if any, is installed. Where billing is based upon Customer usage, Customers will be billed for all usage commencing on the date usage begins.

3.9.2 Subject to the Company's right to cancel or suspend services as otherwise provided in this price list, the minimum service period is 30 days. Termination by Customer is effective after receipt by the Company of a written notice of cancellation. Termination by the Company is effective 30 days after delivery of written notice or as otherwise set forth in this price list or other agreement between the Customer and the Company.

3.9.3 In situations where a Special Service is requested, the minimum service period and charges will be determined on a case-by-case basis.

LONG DISTANCE INTRASTATE TELECOMMUNICATIONS SERVICE

3. GENERAL RULES AND REGULATIONS (Cont'd)3.9 DETERMINATION AND RENDERING OF CHARGES (Cont'd)

3.9.4 All monthly recurring charges are billed one month in advance. Initial and final month's billing, when the service period is less than a month, will be prorated at 1/30th of the month's recurring charge for each day the service was rendered or equipment was provided.

3.9.5 Usage charges are billed monthly for the preceding billing period. For periods less than the monthly billing period, minimum usage charges are prorated at 1/30th of the monthly minimum amount for each day the service was rendered.

3.9.6 The duration of a call is rated in intervals of the billing increments described for each service provided in this price list. If the final interval of a call is less than the applicable billing increment, it will be rounded up to a full increment for purposes of billing.

3.9.7 Computed usage charges or credits for each call are rounded to the nearest cent when possible.

3.9.8 The applicable usage rates for the billing of a distance sensitive call will depend on the distance in airline mileage between the originating and terminating points of the call. For the purpose of determining the airline mileage of a call, the Company will utilize the vertical ("V") and horizontal ("H") coordinates of the rate centers of the originating and terminating points of the call. For purposes of billing, the Company references "V" and "H" coordinates provided by Bell Communications Research. Calls originated by dialing a local exchange number or a 950-type number using an authorization code, the originating point will be the rate center in which the switched access facilities are located. For calls originated via equal access connections, WATS access lines or dedicated access lines, the originating point will be the rate center in which the Customer is located. The terminating point will be determined by the rate center of the called number.

The formula to determine airline miles is as follows:

$$\sqrt{\frac{(V1-V2)^2 + (H1-H2)^2}{10}}$$

3.9.9 Unless noted otherwise, applicable rate periods, as indicated below, are based on the time in which a call is established. In cases where a call begins in one rate period and continues into another, the rate in effect in each period will apply to the portion of the call occurring within the applicable rate period.

3. GENERAL RULES AND REGULATIONS (Cont'd)**3.12 FRACTIONAL CHARGES**

3.12.1 Charges for a fractional part of a month are calculated by counting the number of days remaining in the billing period after service is furnished; then dividing that number of days by thirty days (billing period). The result is then multiplied by the applicable monthly service charge to arrive at the appropriate fractional monthly service charge.

3.12.2 For each call, the minimum charge shall be the applicable charge for the initial billing increment of use with use in excess of the initial billing increment during a call charged at the applicable rate per minute with the fractional billing increments, if any, of each call rounded up to the next highest whole billing increment.
